victoria university secondary college

Achieving Excellence in Teaching and Learning

Victoria University Secondary College NAPLAN Results Continue to Improve

The incredible resilience and hard work of staff and students at VUSC have resulted in remarkable success in the 2021 Year 7 and 9 NAPLAN scores.

NAPLAN Year 9 Writing 547.4 and **Year 9 Spelling 579.8**, both scores are well above the State mean.

At VUSC, our focus on literacy, numeracy, and support for social growth, positive health and wellbeing results in a holistic approach to students' academic, social, and personal development.

Enrolments for 2022 are open.

NAPLAN results pleased teachers and parents of students at VUSC.

VUSC test results impress

The consistent resilience and hard work of the staff and students at Victoria University Secondary College has been reflected in the remarkable results for 2021's NAPLAN results for year 7 and 9 students.

Despite the challenges of the pandemic, students at Victoria University Secondary College are excelling – with year 9 students recording above the Victorian mean score in both writing and spelling for their NAPLAN test, which is a huge improvement on previous years.

The year 9 writing mean score for 2021 is 547.4 (while the state mean is 541.7) while the year 9 spelling mean score for 2021 is 579.8 (and the state mean is 578.1). Both the year 9 numeracy and reading mean scores have also consistently increased over the years as have the number of students in the top two bands in all areas.

These results are due to the hard work and effort staff at VUSC put into getting to know their students. Staff at the college use student data in professional learning teams to set priority focus areas and use student work samples and other formative assessment as evidence to plan intervention strategies and evaluate their impact to improve each student's learning outcomes.

At VUSC, the focus on literacy and numeracy together with support frameworks for social growth and positive health and wellbeing ensures a holistic approach for students' academic, social and personal development. Enrolments for 2022 are open. You're invited to join the exciting community at VUSC.

Copperfield COLLEGE

Gold standard in effort at Copperfield College

As senior students throughout Victoria celebrate the end of their schooling and approach their final exams, Copperfield College is encouraging students to look back on all they have achieved over the past two particularly tumultuous years.

"This time last year, we all thought we were through the worst of the pandemic, but 2021 has taught us that nothing is ever certain," says Copperfield College principal Phillipa Griffiths.

"The Copperfield family would like to congratulate our senior students for the way they have conducted themselves - as often happens, the students we have tried to inspire have ended up inspiring us."

With lockdowns and remote learning, and missing out on school events and celebrations, students could be forgiven for losing much of their enthusiasm and motivation.

"The way our students have adapted to the ever changing landscape and online learning, managed themselves and supported each other through this difficult time is an inspiration," says Ms Griffiths.
"They have demonstrated courage, resilience and maturity beyond their years, and so are very well placed to face the challenges and excitement of post school life."

Copperfield College has a strong commitment to empowering each and every student to aspire and achieve their goals and full potential, with parents, students and staff at the college working collaboratively to motivate, challenge and set high expectations for each other.

With three locations in Victoria, Copperfield College has Years 7 to 10 campuses in Sydenham and Kings Park, and senior students have the choice of completing VCE, VET or VCAL at the Copperfield College Year 11 to 12 campus in Delahey.
